Application No. 10/817,144

Amendment Dated January 28, 2005

Reply to Office Action dated October 29, 2004

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the

application:

**Listing of Claims:** 

1. (currently amended) A fluid meter, in particular a water meter, said water meter

comprising:

a tank having a bottom and into which a measurement chamber is inserted through an

opening opposite said bottom in an insertion direction parallel to [its] an axis of symmetry of

said tank, said [a] measurement chamber having at least one lateral orifice connected in a sealed

manner to a pipe of said tank via a compressible seal that is disposed around said orifice and that

is compressed between an external surface of said chamber, called the first surface, and an

internal surface of said tank, called the second surface, wherein said first and second surfaces are

inclined relative to said axis of symmetry of said tank, and where the minimum distance between

said first and second surfaces and said axis of symmetry is near said bottom of said tank.

2. (original) The meter claimed in claim 1, wherein the distance between said first and

second surfaces and said axis of symmetry is inversely proportional to the distance between said

surfaces and said upper opening.

3. (original) The meter claimed in claim 1, wherein said first and second surfaces are

substantially parallel and said seal is of constant section.

- 4. (original) The meter claimed in claim 1, wherein said seal is housed in a groove formed on said measurement chamber and the bottom of which constitutes said first surface.
- 5. (original) The meter claimed in claim 4, wherein said groove is delimited by two ribs the end faces of which are parallel to said groove bottom.
- 6. (original) The meter claimed in claim 1, wherein the whole of the internal surface of said tank is frustoconical.
  - 7. (original) The meter claimed claim 1, wherein the tank is made of a plastic material.
